**notes**

The boards have uneven edges due to the paper being manually tear. The products could show light differences in papershade and look due to natural raw materials used. The product is completely biodegradable and recyclable. Special runs available upon request.

Envelopes available on stock.

Fabriano is a trademark of Fedrigoni SpA  
The Company reserves the right to modify the technological features of the product in relation to market requirements.

Medioevalis is ideal for announcements, invitations and greetings of high quality.

applications

Can be used without problems with the main printing systems: letterpress, offset, blind embossing, hot foil stamping, thermography and screen printing. The macro-porous surface suggests the use of oxidative drying inks.

printing  
suggestions

Varnishing and plastic laminating must be assessed in advance. The varnish coated with an offset machine is almost fully absorbed and therefore does not improve gloss or protection. Screen-printing varnishing achieves better results, although it is often necessary to perform two shots to achieve a distinctly evident result. The lamination is not recommended. Good results with major processing operations such as: cutting, die-cutting, scoring, folding and glueing.
